

REMARKS

The present amendment is submitted under 37 C.F.R. § 1.312 in order to correct minor formal matters in dependent claims 4 and 21. The present amendment is filed concurrently with the payment of the issue fee, and therefore is being timely filed.

Specifically, dependent claim 4 is amended to correct an inadvertent omission by changing "an active matrix type" to "an active matrix type display device," which is consistent, for example with claims 3 and 9. Dependent claim 21 has been amended to clarify that the display device and the first thin film integrated circuit are in contact with the insulating film.

The amendments are believed to be needed for clarifying or correcting minor obvious errors, and do not require a substantial amount of additional work on the part of the Office. The amendments do not add new matter and review and approval are respectfully requested. If the Examiner feels that any further discussions about this case would be beneficial, he is invited to contact the undersigned.

Respectfully submitted,

Eric J. Robinson
